

Another Miracle For Israel

From Amir Tsarfati, Israeli Christian Bible teacher and founder of Behold Israel. An Israeli scientist who works for the security system and is a doctor of physics wrote the following words to his Rabbi yesterday:

"I wanted to share with the rabbi something that is much more than a feeling. That on Shabbat night something happened here on the scale of the splitting of the Red Sea.

"I am a doctor of physics and I worked for several years in the defense industry in Israel, in projects that are still the cutting edge of the State of Israel. When I look at what happened on Saturday night on a scientific level, it simply cannot happen. Everyone, and I mean everyone, acted as one man in overall unity.

He continued: "The likelihood that everything works out just as it should does not exist in complex systems like the defense systems that were operating. They have never, I mean never, even beyond the State of Israel, and tried in real time. I took a pencil and dove into the calculations to check the likelihood that such a result would materialize.

"The large number of events that had to be handled at precisely the right time doubles the chance of making a mistake.

"With all the high technologies, the expectation was for a breach in the defense of the skies of the State of Israel. Even if we got 90% protection it would be a miracle. What happened though is that everyone, I mean everyone - the pilots, the system operators and the technology operators - acted as one man at one moment in total unity. If this is not an act of God, then I no longer know what a miracle is."

And the doctor marvels and adds, "This is sharper than the victory of the Six Day War or the War of Independence [1948]. There it can be explained according to nature. The rescue that took place for the people of Israel on Shabbat night [April 13, 2024] is simply impossible naturally. I believe that this miracle saved the lives of many people from Israel. If the defense system had failed to intercept a number of cruise missiles, the result would have dragged us into a very complex campaign.

"I wouldn't bet that next time it will work like this without divine supervision. The simple proof of what I said is that the managers of the security industries who develop and manufacture these systems guarantee no more than 90% success!

"Since the day you came out of the land of Egypt we have shown you wonderful things! Happy Holidays!"

That's how he ended his words.

Linda's comments:

Today as I write this it's Tuesday, April 16, 3 days after the huge attack on Israel by Iran. Nearby is a chart showing the numbers of different types of weapons sent by Iran.

Israel, assisted by the U.S., Great Britain, France, Jordan(!), and Saudi Arabia(!), shot down 99% of these drones and missiles, resulting in less damage to the target Israel, than there was in other Muslim countries, where some fell as they misfired or failed.

Russia declared its support for Iran and warned off the U.S. from helping Israel retaliate. One rumor has it that Biden spoke out of both sides of the mouth (Gee, what a surprise!): to his credit, he helped defend Israel from the drones and missiles,

thing as drones 1995 when they wrote it) just fall out of the sky and burn on the ground. Interestingly, what did happen in this Iranian attack is not too far from that. The drones, cruise missiles, and ballistic missiles did fall out of the sky, after being shot down by the coalition of nations defending Israel.

So how is that God's supernatural intervention, you ask? I thought as it was happening that God had a hand in it, because who would have thought that Crazy Joe Biden would provide the help he did after his threats when Israel refused his orders regarding Hamas and Gaza? Who ever would have thought that Jordan and Saudi Arabia, and maybe some others who remain unnamed, would lend help to defend Israel??? That alone to my mind is a miracle.

But there's much more to the miracle than that, however. Please read the article

nearby that my favorite Bible teacher, Amir Tsarfati, wrote on his Telegram channel. He quotes what a physics PhD wrote to his rabbi about the miracle of April 13, involving technical aspects I would never have guessed. I was totally amazed to read it!

Thank You, Father, for that miracle! Thank You that we can expect the same kind of care and attention from You that you demonstrated for Israel that Saturday.

Wow! What a God we have! And yes, it is getting late, either in the world's timeline of the End, or your personal timeline. We'd all best get or be right with God because He may sooooooon wrap things up.

Linda Gimmel

but at the same time, he also is trying to pressure Israel to not retaliate against Iran and to not finish off Hamas by going into Rafah, the last major stronghold in Gaza for Hamas senior leadership and military divisions. Following those orders from Biden would mean suicide for Israel, which would make his puppet master Obama happy, since Obama detests Israel.

The Bible itself has lots to say about the conflict between Israel and its enemies, especially in the End Times, which keeps many Christians, pastors, and Bible teachers busy theorizing what will happen and when it will happen. Are we in the End Times? Is the attack by Iran the beginning of the wars predicted in the book of Ezekiel? Will God intervene supernaturally to protect Israel from destruction by its many enemies? Many books are written, many sermons delivered, many admonitions given, warning us to get right with God at this late hour.

The only legitimate answer to all of that, I believe, is "I don't know." There are plenty of signs that we are in or approaching the End Times, but beyond that, all detail and timing is totally up to God and beyond our knowledge and calculation.

I do believe that God will involve Himself in Israel's protection. The wonderful series of books about the end times, "Left Behind", by Jerry Jenkins and Tim LeHaye, depicts God's supernatural intervention by having Russian attack planes (no such

Lucerne Valley's MEGA SWAP MEET!

Sat., June 1
8am to 3pm
